ABOUT nTIER SOLUTIONS

nTier Solutions Ltd - within a short span of its operation, has proved to be a unique software development firm: in the sense that all of its solutions were proven to be reliable beyond expectation. In addition, providing on -dot support has enabled the company to gain respect and trust from many of its clients.

Our unique technical architecture was designed after deep research, which not only ensures smoother running of an application, but also guarantees minimal downtime and state -of-the art security ensuring corporate dependability. Our dynamic real-time help system, a technology developed solely by our able development team, is based upon expert system, where our software learns patterns and usage habits of a user to give him/her a real -time help that is most applicable for the user.

In less than a year of its official operation, nTier Solutions has achieved a client-list which can be boasted by only a small number of software companies of Bangladesh. To top that we have also pierced into the International Market, with two North American companies already selecting nTier Solutions as their official development partners for Asia-Pacific region.

Customized Applications

No two solutions are the same. Off-the-shelf solutions for enterprises don't exactly do what you need. People with ready-made software end up compromising on quality and ease of work. While umbrellas serve you in rain, raincoats don't really do so. Our software is customized for your exact needs. Don't work for the software, make the software work for you.

We appreciate how valuable data is to you. So we design your system architecture using fail safe technology for maximum robustness. Plus, most of your customizations can be readily achieved by changing our established modules. In other words, since we have the core, your needs be fulfilled in an astonishing rate.

With us, you can be working in the automated world in no time! Contact us, we'll make a schedule to visit you, analyze your system, and make estimations. If we see eye to eye, we develop your software within the stipulated time.

Web Sites & Applications

In this age of Information technology, corporate presence is dependent on having a great website. Your website is your signboard, brochure, visiting card on the information superhighway. However, a website is a way in helping your business maintenance is more intelligent than any way is possible. Thus web applications are now on the trend, where you can manage your office through browser based applications, running on any computer has access to Internet.

Many of our ERP modules are thus developed, is a platform for the manager or the owner of a business, - it is updated every real time on happenings on your factory or office.

Our dynamic websites ensure that clients update their contents from their office without regular dependence on a business. The website is in updating mode all the time at the clients will. We provide with secured administration for the purpose.

Our web services also includes Domain Registration and Secured of the art servers hosted with its in-house. Our server technology includes Unix, Windows (Dot.Net) servers with multiple FTP, Index Panel, Web Mail, POP Mail (Outlook, Thunderbird and Eudora Compatible) Recipient Emails, dynamic web stats and many more.

Some of our developed websites:

The Anti Corruption Commission Official Website.

This is a completely dynamic, dual language (English & Bangla) website available for general viewers. The website gives detailed information on the work of the commission, online complaint lodging system, dynamic news and events updates, dynamic verdicts and notices, as well as a comprehensive

knowledge base.

dedicated accounts to share their information with selective doctors. doctors login allows the doctors to provide feedback online.

www.lasermedicalbd.com

Laser Medical Center

completely dynamic website for a technologically advanced clinic. Gives details of their services, extensive knowledge base on laser technology in treatments online Know your Skin Feedback form. A completely dynamic Doctor Section deals with patients logging in to a

TV Islamic SA

A Live Transmission online TV broadcasting system (under testing), researched and developed by nTier Solutions, for the first time in Bangladesh.

Previously, many companies developed Video demand system that worked in lieu with YouTube and other on-demand video websites.

However, this is the first time that live video feeds are transmitted online in a configuration that minimal buffer times are required, resulting in real-time TV viewing with only average speed internet connectivity. The system is under test run to evaluate video and audio throughputs, and has features for both Video-on-demand as well as Live TV Feeds. The website uses CDNs that dynamically detects geographical location of clients requests to provide the fastest TV Feeds using nearest server to the client, and a unique TV-like experience on the website. The website has features that can enable users to toggle between browser screens.
